DETAILED ACTION

Allowable Subject Matter

Claims 14-15 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach nor suggest, in the claimed combination, an electromagnetic switch for a starter with a plate-like terminal having a first end and a second end, the first end being attached to the bobbin in an axial direction of the bobbin; a cover mounted on the terminal, wherein the terminal passes through the cover in the axial direction; and a rod slidable in the bobbin in the axial direction with the plunger, the rod defining an annular groove on an outer circumferential surface and having a first end and a second end opposite to each other, the first end opposing the plunger; and a rod cover fitted on the rod and having a flange, a cylindrical part and a distal end opposite to the flange, the cylindrical part having a plurality of projections which project inwardly from an inner circumferential surface of the cylindrical part, are arranged in a circumferential direction, and are fitted in the annular groove, and the cylindrical part defining a plurality of slits each of which extends in the axial direction between the plurality of projections without reaching the distal end.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
